

Professional Advantage Showcase

09:00 – 09:30

ARRIVAL & REGISTRATION Tea, coffee & pastries upon arrival

09:30 – 10:00

WELCOME & INTRODUCTION David Singh our Director of Sales and Marketing opens the event and introduces the team from Professional Advantage. He will share his thoughts on why Professional Advantage is the premier SunSystems development partner and why PA software is a necessary and secure investment. Andrew Parsons, UK Country Manager will introduce PA and talk about their development ethos and strategy

Session 1

COLLECT A comprehensive credit management solution for SunSystems, Collect is designed to automate & streamline your credit control to improve productivity and to bring immediate cost benefits. Collect will increase your working capital, and reduce long term overdue amounts through automating the sending of regular statements and reminder letters.

Session 2

CONTRACT & SERVICE BILLING An invoicing module catering for contract, recurring and ad hoc invoices. It works in sync with your business processes to remove manual tasks and increase billing accuracy and speed. It can also handle deferred revenue ensuring you are fully compliant with your revenue recognition policies.

11:00 - 11:15

REFRESHMENT BREAK

Session 3

iPOS For anyone looking for a quick to implement procurement solution that integrates with SunSystems 4 & 6 "out of the box" look no further. iPOS has for the past two decades been one of the most popular P2P solutions in the SunSystems community. With iPOS, you get real-time budget checking and control, true accruals accounting, full (soft & hard) commitment accounting, instantaneous posting & deep ledger integration. In this session we will show you some of the key functions, features and benefits in using the latest version of iPOS.

Session 4

B4B Is an easy to use yet sophisticated payment management tool catering for today's global banking requirements. B4B brings international and domestic payments together, allowing multi-national companies to set up a global payments operation from a single source. This reduces inaccuracies, time and cost.

Session 5

BANK REC Easily maintain your current bank account(s) position with Advanced Bank Reconciliation. The one step statement upload saves time, allowing you to reconcile your bank account(s) on a daily basis if required. This highly automated process allows you to identify, track and resolve non-reconciled items at a glance, even across multiple accounts, without the need to convert to a journal file.

Session 6

MAKING TAX DIGITAL The latest addition to the PA stable of trusted applications, get ready for April 2019 when you will be required to process, store and transmit VAT return data to HMRC using Functional Compatible Software. PA and TouchstoneFMS are delighted to launch this module at this showcase event and show you the software in action.

12.45

SUMMARY & CLOSE - LUNCH David Singh wraps up the morning & gives details of a special price promotion. Followed by a Networking lunch.
