

High-Performance Cloud Solutions custom-built for you, fully managed by us.

From SMEs to large enterprises, we help you deliver your service through the Cloud - without the complexity of managing it yourself.

Based entirely in the UK and serving hundreds of users every single month across the globe, we're a good fit if your business demands turnkey high performance, resilience, and simplicity - while never being punished for growth.

Why Clients Choose Us

Faster

Our Managed Private Cloud is independently proven to be up to 76% faster than Public Cloud.

Fixed, Transparent Pricing

No hidden costs or surprise charges - our pricing is around 50% cheaper than Public Cloud, fixed, and never punishes you for scale or consumption.

Exceeding Industry Standards

We've been awarded the industry's highest certifications and accreditations for business security, safety, and continuity, including ISO 27001, ISO 22301, ISO 9001, and Cyber Essentials Plus.

Reliable Disaster Recovery

A service that works every time, backed by quarterly testing.

99.999% Network Uptime

Our experts ensure your systems are secure, online, and optimised for peak performance. TouchstoneCloud has not had an infrastructure outage since adopting BlackBox Hosting in 2016.

Robust Security

Next-gen layered security ensure your data never leaves the country, and uses full encryption at rest to shield your services against even the most aggressive cyber threats, including ransomware and DDoS attacks.

Seamless Migration

Scoped out and handled entirely by experts to meet the exact needs of your business.

Advanced, Dedicated Support

Personalised assistance and rapid responses from our experienced team of experts ensure seamless operations and maximum uptime.

Certified Carbon Neutral

Our data centres are powered by 100% carbon neutral energy and we're committed to measuring, offsetting, and reducing future carbon emissions. We are carbon neutral certified.

TouchstoneCloud is a dedicated private cloud solution delivered through scalable, secure, and stable design.

Designed by infrastructure and application experts and with no fixed term contract, TouchstoneCloud's performance is 25% faster than Azure and AWS. It supports Infor, Proactis, Professional Advantage, Hexagon, and systems@work products, and is ISO 27001, ISO 22301, ISO 9001, and Cyber Essentials Plus certified. Powered by BlackBox Hosting, which is CSA STAR L2 certified and has SOC2 compliant UK data centres, TouchstoneCloud is further enhanced by managed services tailored for SunSystems and add-on applications.
